LIBERTY ENDOSCOPY CENTER

EXECUTIVE SUMMARY

Liberty Endoscopy Center, LLC (the Center) is an existing, single-specialty (gastroenterology) freestanding ambulatory surgery center (FASC) located at 156 William Street, New York (New York County), New York 10038. The Center is submitting this Full Review Certificate of Need Application seeking approval to convert from a single-specialty FASC to a dual single-specialty FASC, specializing in gastroenterology and vascular surgery (minimally invasive vein treatments).

There is no construction needed to implement this service addition project. The Center has four (4) procedure rooms, all of which will be adequate and equipped for vascular procedures.

Martin Wolff, M.D., an existing member and Medical Director of the Center, will continue to serve as the Center's Medical Director. Admission to the Center for services is, and will continue to be, based solely on medical need, and ability to pay will not be a factor.

The Health Equity Impact Assessment concludes that this project will have a positive impact on the community served by the Center, especially for women and older adults.

New York State Department of Health Health Equity Impact Assessment Requirement Criteria

Effective June 22, 2023, a Health Equity Impact Assessment (HEIA) will be required as part of Certificate of Need (CON) applications submitted by facilities (Applicant), pursuant to Public Health Law (PHL) § 2802-b and corresponding regulations at Title 10 New York Codes, Rules and Regulations (NYCRR) § 400.26. This form must be used by the Applicant to determine if a HEIA is required as part of a CON application.

Section A. Diagnostic and Treatment Centers (D&TC) - This section should only be completed by D&TCs, all other Applicants continue to Section B.

Table A.

Diagnostic and Treatment Centers for HEIA Requirement		No
Is the Diagnostic and Treatment Center's patient population less than 50% patients enrolled in Medicaid and/or uninsured (combined)?		
Does the Diagnostic and Treatment Center's CON application include a change in controlling person, principal stockholder, or principal member of the facility?		

- If you checked "no" for <u>both</u> questions in Table A, you do <u>not</u> have to complete Section B this CON application is considered exempt from the HEIA requirement. This form with the completed Section A is the only HEIA-related document the Applicant will submit with this CON application. Submit this form, with the completed Section A, along with the CON application to acknowledge that a HEIA is not required.
- If you checked "yes" for either question in Table A, proceed to Section B.

Section B. All Article 28 Facilities

Table B.

Construction or equipment	Yes	No
Is the project minor construction or the purchase of equipment, subject to Limited Review, <u>AND</u> will result in one or more of the following:	П	\boxtimes
 a. Elimination of services or care, and/or; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Expansion or addition of 10%* or greater in the number of certified beds, certified services or operating hours? Per the Limited Review Application Instructions: Pursuant to 10 NYCRR 710.1(c)(5), minor construction projects with a total project cost of less than or equal \$15,000,000 for general hospitals and less than or equal to \$6,000 for all other facilities are eligible for a Limited Review. 		

Establishment of an operator (new or change in ownership)	Yes	No
Is the project an establishment of a new operator or change in ownership of an existing operator providing services or care, AND will result in one or more of the following: a. Elimination of services or care, and/or; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Change in location of services or care?		
Mergers, consolidations, and creation of, or changes in	Yes	No
ownership of, an active parent entity		
Is the project a transfer of ownership in the facility that will result in one or more of the following: a. Elimination of services or care, and/or; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Change in location of services or care?		
Acquisitions	Yes No	
Is the project to purchase a facility that provides a new or similar range of services or care, that will result in one or more of the following: a. Elimination of services or care, and/or; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Change in location of services or care?		
All Other Changes to the Operating Certificate	Yes	No
Is the project a request to amend the operating certificate that will result in one or more of the following: a. Elimination of services or care; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Expansion or addition of 10%* or greater in the number of certified beds, certified services or operating hours, and/or;		
d. Change in location of services or care?		indicated on

*Calculate the percentage change from the number of certified/authorized beds and/or certified/authorized services (as indicated on the facility's operating certificate) specific to the category of service or care. For example, if a residential health care facility adds two ventilator-dependent beds and the facility had none previously, this would exceed the 10% threshold. If a hospital removes 5 out of 50 maternity certified/authorized beds, this would meet the 10% threshold.

- If you checked "yes" for one or more questions in Table B, the following HEIA documents are required to be completed and submitted along with the CON application:
 - o HEIA Requirement Criteria with Section B completed
 - o HEIA Conflict-of-Interest
 - o HEIA Contract with Independent Entity
 - o HEIA Template
 - o HEIA Data Tables

- o Full version of the CON Application with redactions, to be shared publicly
- If you checked "no" for all questions in Table B, this form with the completed Section B is the only HEIA-related document the Applicant will submit with this CON application. Submit this form, with the completed Section B, along with the CON application to acknowledge that a HEIA is not required.

April 8, 2025

Larry Trenk Vice President, Operations Liberty Endoscopy Center

Dear Mr. Trenk,

Ankura Consulting Group, LLC, operating through its Sachs Policy Group ("Ankura" or "SPG"), is pleased to submit this proposal for the completion of a Health Equity Impact Assessment ("HEIA") for the Liberty Endoscopy Center.

This proposal outlines the key components and processes SPG will use to execute the HEIA, drawing upon the expertise of SPG's consultant team, inclusive of individuals with extensive experience in health equity, stakeholder/community engagement, and health policy.

BACKGROUND

Starting June 22, 2023, New York State law (S1451/A191) mandates a HEIA along with certificate of need (CON) applications for Article 28 healthcare facilities. This assessment evaluates if a project affects service access, enhances health equity, and reduces disparities for medically underserved groups, involving meaningful community input and independent analysis. The HEIA requirement ensures that community voices are considered and provides an objective, independent assessment of the anticipated impact of the project on the public health of, service delivery of, or access to hospital and health services for historically medically underserved groups.

The proposed project involves adding low-acuity vein procedures to an existing ambulatory surgery center ("Liberty Endoscopy Center") located in downtown Manhattan.

SPG RELEVANT EXPERIENCE

The HEIA team at SPG is a diverse and experienced group dedicated to addressing health disparities and promoting equitable access to care. The team has been deeply involved in the HEIA process since it was rolled out by New York State, having already been engaged on numerous HEIAs for a variety of stakeholders, including hospitals, Article 28 outpatient facilities, and nursing homes.

The team comprises experts with extensive backgrounds in health policy, population health, data analysis, community engagement, and anti-racism. We are committed to understanding and improving how social, environmental, and policy factors impact health equity, particularly for historically marginalized communities.

The team collaborates with a wide range of health care organizations, government agencies, and communities to provide strategic support with an overarching goal of advancing diversity, equity, and inclusion. Our work encompasses research and evaluation of health programs and initiatives, stakeholder engagement, policy analysis, and development of mitigation and monitoring strategies.

In particular, the team has experience analyzing policy proposals that impact medically underserved groups, such as Medicaid programs serving children and maternal health initiatives that aim to reduce pre- and post-partum health disparities. We are dedicated to supporting organizations that serve vulnerable populations, including safety net hospitals, community health centers, long-term care organizations, behavioral health providers, child welfare agencies, and providers that support individuals with intellectual and developmental disabilities.

SPG is well-positioned to provide the required HEIA services for the Liberty Endoscopy Center. Our approach includes a comprehensive demographic profile of the facility's primary service area, meaningful stakeholder engagement, and a detailed analysis of the project's potential impacts on community residents, focusing on medically underserved groups. We will complete the HEIA process and provide all required documentation, ensuring compliance with the State's guidelines and conflict-of-interest requirements.

SCOPE OF WORK

The following generally outlines the activities necessary to conduct and successfully complete the HEIA as required by the State Department of Health (DOH). The expected duration of this engagement is 6 weeks.

1. Comprehensive Review and Analysis

SPG will use both publicly available data and data requested from Liberty Endoscopy Center to conduct a comprehensive review of the service area and to identify populations, specifically medically underserved groups, that may be impacted by the proposed project. Using descriptive statistics and data visualizations, SPG will efficiently paint a picture of the community and its patient profiles. Examples of data may include, but are not limited to, the following:

- · Data provided by Liberty Endoscopy Center
- New York State DOH
- Statewide Planning and Research Cooperative System (SPARCS)
- US Census Bureau Data
- Community Health and Community Service Needs Assessments
- Health Facilities Information System (HFIS)
- Health Resources and Services Administration (HRSA) shortage area data
- · Area Deprivation Index
- Supplemental claims data as needed/by request
- Publicly available medical literature, grey literature, publications, and reports
- · Stakeholder interviews and surveys
- · Additional sources as identified/available such as RWJ, Kaiser Family Foundation, etc.

2. Meaningful Stakeholder and Community Engagement

SPG will perform meaningful, culturally competent, and sensitive engagement to obtain diverse stakeholder and community feedback on how the project impacts the unique health needs or quality of life of historically medically underserved group(s). From our experience, SPG understands that meaningful engagement with the community and stakeholders is crucial for a successful HEIA. We recognize that this process requires thoughtful planning, dedicated time, and resources to ensure an inclusive and impactful approach that effectively captures the diverse perspectives, experiences, and

needs of those most affected by the proposed project. The types of activities that may be performed include, but are not limited to:

- Create culturally appropriate and engaging communications materials to promote participation in the HEIA stakeholder engagement process, including translation services to ensure access for individuals with limited English proficiency.
- Develop culturally competent community surveys and/or host community forms to gather input on the potential impacts of the project related to health equity.
- Conduct interviews or focus groups with key stakeholders, including the local health department, community members, health care professionals, and public health experts.

SPG will work closely with Liberty Endoscopy Center staff and its community partners to promote these engagement opportunities, with a focus on reaching historically underserved and marginalized groups. SPG will carefully review and synthesize all feedback, looking for common themes, concerns, and recommendations that can inform the project's planning and implementation. We will also prepare a summary of the engagement conducted and feedback received, which will be included in the HEIA data tables and final report.

The final community engagement plan will reflect the needs of the underlying project.

3. Health Equity Impact and Mitigation Strategy with Recommendations

SPG will utilize the insights gathered from our research/data analysis and stakeholder/community outreach to support the development of a mitigation strategy for any impacts identified. We will also provide recommendations to support programs and interventions that support health equity and quality of care for the impacted medically underserved group(s). This strategy will include:

- Data-informed interventions and new or expanded collaborations with health-related and/or community-based organizations.
- Evidence-based ways to reduce potential negative impacts as a result of the project, as applicable.
- Specific changes to the project to better meet the needs of medically underserved groups, as applicable.
- Approaches for monitoring and tracking progress on health equity, including the use of
 performance and quality measures such as access to screenings for historically medically
 underserved groups, timely to access care, processes and referrals with partner organizations, and
 general health outcomes for impacted groups.

4. Support of Delivery of Required HEIA Documents

SPG will organize and summarize findings in a final health equity impact assessment report that supports the completion of the following documents for Liberty Endoscopy Center:

- HEIA Template
- HEIA Data Tables
- HEIA Conflict of Interest
- HEIA Contract (Independent Entity and Facility)

The following forms will need to be completed by the Liberty Endoscopy Center, and SPG will be available to advise in complying with these requirements according to DOH:

- HEIA Requirement Criteria
- HEIA Template SECTION C: Acknowledgement and Mitigation Plan
- Dissemination of Results and Recommendations: Public Posting of Redacted full CON Application and HEIA Online and NYSE-CON System

5. Additional Services Performed During the Course of the Engagement

During the engagement, SPG will monitor the availability of, and offer strategic guidance, regarding any updates in HEIA policy and requirements for the Liberty Endoscopy Center.

Notwithstanding any other engagements between SPG and Liberty Endoscopy Center, SPG will have no formal or informal involvement with any CON (or the related underlying project) for which SPG is performing a HEIA.

PROJECT COST

The project cost of completing the HEIA activities and required documents as required by the New York State DOH will be \$18,000 – paid in two installments: \$9,000 at the start of the project and \$9,000 upon delivery of the required HEIA documents.

OTHER TERMS AND CONDITIONS

Except in the event of gross negligence, neither you nor anyone acting on your behalf shall hold Ankura liable for (i) an aggregate amount (including interest and legal fees) in excess of the amount of Fees actually received by Ankura from you pursuant to this agreement, (ii) loss of profit, goodwill, business opportunity, anticipated savings or benefits, or (iii) special, consequential, exemplary, incidental, punitive or indirect damages.

This letter agreement may be executed in counterparts (and by facsimile or other electronic means), each of which shall constitute an original and all of which together will be deemed to be one and the same document.

(Remainder of page intentionally left blank.)

If this letter correctly sets forth our understanding, please indicate your acceptance in the space provided below, and your acceptance shall constitute a binding agreement.

Sincerely,

ANKURA CONSULTING GROUP, LLC

Health Equity Impact Assessment Template

Refer to the Instructions for Health Equity Impact Assessment Template for detailed instructions on each section.

SECTION A. SUMMARY

1.	Title of project	LEC VIP Medical
2.	Name of Applicant	Liberty Endoscopy Center (LEC)
3.	Name of Independent Entity, including lead contact and full names of individual(s) conducting the HEIA	Sachs Policy Group (SPG) – 212-827-0660 Jaclyn Pierce, MPH jpierce@sachspolicy.com Anita Appel, LCSW - AnitaAppel@sachspolicy.com Maxine Legall, MSW, MBA - mlegall@sachspolicy.com Qualifications: Health equity – 6 years Anti-racism – 6 years Community engagement – 25+ years Health care access and delivery – 10+ years
4.	Description of the Independent Entity's qualifications	The Health Equity Impact Assessment (HEIA) Team at Sachs Policy Group (SPG) is a diverse and experienced group dedicated to addressing health disparities and promoting equitable access to care. The team comprises experts with extensive backgrounds in health policy, population health, data analysis, community engagement, and anti-racism. They are committed to understanding and improving how social, environmental, and policy factors impact health equity, particularly for historically marginalized communities. The team collaborates with a wide range of health care organizations, government agencies, and communities to provide strategic support with an overarching goal of advancing diversity, equity, and inclusion. Their work encompasses research and evaluation of health programs and initiatives, stakeholder engagement, policy analysis, and development of mitigation and monitoring strategies.
		In particular, the team has experience analyzing policy proposals that impact medically underserved groups, such as Medicaid programs serving low-income individuals and maternal health initiatives that aim to reduce pre- and post-partum health disparities. They are

	dedicated to supporting organizations that serve vulnerable populations, including safety net hospitals, community health centers, long-term care organizations, behavioral health providers, child welfare agencies, and providers that support individuals with intellectual and developmental disabilities.
	The SPG HEIA team is deeply passionate about improving the health care delivery system, especially for underserved populations. The team is unwavering in its commitment to promoting equity through rigorous research, insightful consulting, and strategic advisory work.
5. Date the Health Equity Impact Assessment (HEIA) started	May 15, 2025
6. Date the HEIA concluded	July 28, 2025

7. Executive summary of project (250 words max)

This project seeks to expand the procedures offered at Liberty Endoscopy Center (LEC), which is currently a gastrointestinal-focused ambulatory surgery center. These new procedures would include specific vascular procedures—namely, radiofrequency ablation and Varithena treatments—which are appropriately performed in a procedure room setting by a qualified surgeon.

8. Executive summary of HEIA findings (500 words max)

LEC seeks to expand its Article 28 license by adding minimally invasive vein treatments—radiofrequency and Varithena ablations—to its lower Manhattan site, which already performs endoscopy services. Our assessment determined that older adults and women will be the primary beneficiaries. Both groups face higher risks for chronic venous disease: prevalence climbs with age, complications such as thrombosis and ulcers are more common among seniors, and pregnancy-related physiologic changes make varicose veins disproportionately frequent in women. Physicians confirmed that these demographics are highly prevalent in their current vein caseloads.

By co-locating vein care within an already licensed ambulatory surgery center, the project can open rapid, high-quality access to safe, sterile procedures without disrupting existing services, immediately expanding appointment availability for nearby residents. Afternoon scheduling of vein cases after morning endoscopies maximizes shared staff and space, while the outpatient setting offers older adults and busy women convenient, same-day treatments that avoid hospital fees and overnight stays. Coupled with existing referral networks, this integration supports seamless continuity of care, earlier intervention, and reduced

complications—ultimately narrowing treatment gaps and easing cost, time, and mobility burdens for these medically underserved groups. Interpreter services, including American Sign Language and multilingual personnel, are already in place, and the center remains fully ADA compliant. Interviews with surgeons, staff, the local health department, and community partners, plus an English- and Spanish-language survey, consistently supported the project.

To maximize impact, we recommend that LEC pursue several actions. First, forge partnerships with women's health providers—OB-GYN practices, Planned Parenthood—to streamline referrals and host virtual education sessions on venous disease. Second, collaborate with senior centers and long-term-care operators to publicize the service and coordinate transportation. Third, leverage existing ties with Federally Qualified Health Centers and community partners to reach broader underserved populations. Fourth, reassure current gastroenterology patients that their care experience and clinical team remain unchanged. Fifth, sustain open dialogue with staff, patients, and referral partners to monitor integration and capture feedback. Finally, develop vein-specific quality metrics, such as thirty-day occlusion, re-intervention, and ulcer-free survival—stratified by demographic factors to track equity outcomes.

SECTION B: ASSESSMENT

For all questions in Section B, please include sources, data, and information referenced whenever possible. If the Independent Entity determines a question is not applicable to the project, write N/A and provide justification.

STEP 1 - SCOPING

1. Demographics of service area: Complete the "Scoping Table Sheets 1 and 2" in the document "HEIA Data Tables". Refer to the Instructions for more guidance about what each Scoping Table Sheet requires.

Please see attached spreadsheet titled "heia_data_tables_LEC.xlsx"

- 2. Medically underserved groups in the service area: Please select the medically underserved groups in the service area that will be impacted by the project:
 - Older adults
 - Women
- 3. For each medically underserved group (identified above), what source of information was used to determine the group would be impacted? What information or data was difficult to access or compile for the completion of the Health Equity Impact Assessment?

We analyzed utilization data from the Applicant, census data for the service area, academic literature, information obtained from interviews with center staff and external stakeholders, and information obtained from a community survey. We were not able to access market share information for other similar service providers in the area.

4. How does the project impact the unique health needs or quality of life of each medically underserved group (identified above)?

We expect the Applicant's proposal to add vein procedures to its operating certificate to primarily impact older adults and women because these groups are more at risk for chronic venous conditions and are therefore more likely to need procedures such as radiofrequency ablation and Varithena ablation. These minimally invasive procedures "have revolutionized varicose vein treatment, offering high success rates and quicker recovery compared to traditional surgery." The physicians that will be performing the vein procedures confirmed that while varicose veins and related complications are a common problem affecting a significant portion of the population, older adults and women are frequent patients due to their unique risk factors outlined below.

Older Adults

Approximately 16% of individuals in the Applicant's service area are over the age of 60, compared to 24% statewide.² New York currently has the 4th largest population of older adults in the country, with the aging population continuing to increase.³ The prevalence of venous disease and varicose veins increases with age.^{4,5} Older adults are also at greater risk for complications related to varicose veins, such as venous thrombosis or ulcers.^{6,7} Varicose veins are an increasingly frequent cause of discomfort and decreased

⁵ Eberhardt, R. T., & Raffetto, J. D. (2014). Chronic venous insufficiency. *Circulation, 130*(4), 333–346. https://doi.org/10.1161/CIRCULATIONAHA.113.006898

⁶ Mok, Y., Ballew, S. H., Kucharska-Newton, A., Butler, K., Henke, P., Lutsey, P. L., Salameh, M., Hoogeveen, R. C., Ballantyne, C. M., Selvin, E., & Matsushita, K. (2025). Demographic and clinical risk factors of developing clinically recognized varicose veins in older adults. *American Journal of Preventive Medicine*, *68*(4), 674–681. https://doi.org/10.1016/j.amepre.2024.12.009

⁷ Attaran, R. R., & Carr, J. G. (2022). Chronic venous disease of the lower extremities: A state-of-the-art review. Journal of the Society for Cardiovascular Angiography & Interventions, 2(1), Article 100538. https://doi.org/10.1016/j.jscai.2022.100538

quality of life with age, but surgical treatment can be more effective than conservative management.⁸ As a result, older adults may be more in need of additional access points for low acuity vein procedures in the service area.

Women

Approximately 52% of individuals in the Applicant's service area are female, compared to 51% statewide.² Most studies indicate that varicose veins present more commonly in women compared with men.^{5,5,9} Pregnancy is a major contributory factor in the increased incidence of varicose veins in women and is also considered a risk factor for chronic venous insufficiency.⁴ As a result, women may be more in need of additional access points for low acuity vein procedures in the service area.

5. To what extent do the medically underserved groups (identified above) currently use the service(s) or care impacted by or as a result of the project? To what extent are the medically underserved groups (identified above) expected to use the service(s) or care impacted by or as a result of the project?

Tables 1 and 2 below outline the age and gender distribution of current patients at the facility. Since services at LEC are currently limited to endoscopic procedures, we expect the demographics of the patient population to change slightly. Because the outlined risk factors are most common in older adults and women, introducing vein procedures will likely boost the facility's overall service volume—especially from these two groups.

Table 1. Age

Age	% of Patients
Under 18	0%
18-34	35%
35-49	39%
50-64	20%
65+	6%

Table 2. Gender

Gender	% of Patients
Male	46%

6. What is the availability of similar services or care at other facilities in or near the Applicant's service area?

Clinical facilities in Manhattan that offer outpatient vein procedures such as sclerotherapy, laser treatment, radiofrequency ablation, or Varithena ablation and their distance from the Applicant's site are outlined in Table 3 below.

Table 3. Manhattan-Based Outpatient Centers Providing Vein Procedures

Provider	Location	Distance from LEC
Liberty Endoscopy Center (LEC)	156 William St., NY, NY 10038

7. What are the historical and projected market shares of providers offering similar services or care in the Applicant's service area?

We were not able to obtain outpatient data specific to each of the practices above to adequately measure the market share.

8. Summarize the performance of the Applicant in meeting its obligations, if any, under Public Health Law § 2807-k (General Hospital Indigent Care Pool) and federal regulations requiring the provision of uncompensated care, community services, and/or access by minorities and people with disabilities to programs receiving federal financial assistance. Will these obligations be affected by implementation of the project? If yes, please describe.

N/A

9. Are there any physician and professional staffing issues related to the project or any anticipated staffing issues that might result from implementation of project? If yes, please describe.

There are no staffing issues anticipated related to the project. The facility will be bringing on a new vascular surgeon to complete the vein procedures onsite. The vascular surgeon currently performs these procedures within VIP Medical Group, which is located within the same building as LEC and is where the consultations for all procedures will take place. Existing support staff, such as nurses and technicians, will be trained to support the surgeon during the procedures.

10. Are there any civil rights access complaints against the Applicant? If yes, please describe.

No

11. Has the Applicant undertaken similar projects/work in the last five years? If yes, describe the outcomes and how medically underserved group(s) were impacted as a result of the project. Explain why the applicant requires another investment in a similar project after recent investments in the past.

No

STEP 2 - POTENTIAL IMPACTS

- 1. For each medically underserved group identified in Step 1 Question 2, describe how the project will:
 - a. Improve access to services and health care
 - b. Improve health equity
 - c. Reduce health disparities

By offering low acuity vein procedures at the existing endoscopy clinic, the project will create an additional outpatient option in lower Manhattan – expanding patient choice of both provider and location. Enhancements to access include:

1. **Co-Location benefits:** The clinic already holds an Article 28 license for sterile outpatient procedures and meets all relevant clinical and regulatory requirements and standards. There are no capital changes required, and only minimal equipment

- and staff training will be necessary. This will result in a rapid start-up of services and more immediate appointment availability for neighborhood residents.
- 2. Complementary scheduling and shared staff: According to staff and other experts in the field, endoscopy procedures typically take place in the early morning due to the preparation requirements, allowing for afternoon blocks to be dedicated to vein procedures. This maximizes the facility's current space and staffing while ensuring no disruption to existing patients and services. Operations staff confirmed that LEC currently has the physical space and staff capacity to accommodate new patients.
- 3. Ambulatory setting: Low acuity procedures, such as radiofrequency ablation, provided in an ambulatory setting rather than in the hospital can be both convenient and cost-effective. 10 Research shows that vein treatment procedures performed in an outpatient setting demonstrate comparable results to those obtained in a conventional operating theater, with particularly benefits for individuals over age 65 who can better tolerate outpatient procedures compared to hospitalization. 11 Studies also shows that most patients including women juggling family or work seeking treatment for varicose veins prefer local anesthetic therapy and single visit treatment options compared to surgery. 12
- 4. **Continuity of care:** Given that LEC has existing gastrointestinal services and referral partnerships with primary care providers, the project may improve continuity of care and access to other services for patients newly seen at the clinic for vein procedures. Cross-disciplinary case conferences and warm hand-offs reduce fragmented care, shorten wait times for ancillary services, and improve adherence to follow-up—ultimately lowering the risk of ulceration, infection, and emergency department use.

For women, the improved access to same-day procedures in an outpatient setting with flexible scheduling may improve convenience and help with childcare constraints or other time limitations. For older adults, the outpatient model avoids an overnight stay in a hospital setting and the local community access can minimize transportation barriers for mobility-limited seniors. For both populations, earlier intervention can reduce the likelihood of advanced skin changes, increased discomfort, ulcers, and other complications that disproportionately affect women and older adults. Collectively, this

¹¹ Varetto, G., Gibello, L., Frola, E., Trevisan, A., Trucco, A., Contessa, L., & Rispoli, P. (2018). Day surgery versus outpatient setting for endovenous laser ablation treatment: A prospective cohort study. *International Journal of Surgery*, *51*, 180–183. https://doi.org/10.1016/j.ijsu.2018.01.039

¹² Shepherd, A. C., Gohel, M. S., Lim, C. S., Hamish, M., & Davies, A. H. (2010). The treatment of varicose veins: An investigation of patient preferences and expectations. *Phlebology*, *25*(2), 54–65. https://doi.org/10.1258/phleb.2009.009008

project can help close treatment gaps for women and older adults, brining low acuity vein care close to home while easing cost, time, and mobility burdens.

2. For each medically underserved group identified in Step 1 Question 2, describe any unintended <u>positive and/or negative</u> impacts to health equity that might occur as a result of the project.

For women and older adults, and others who are at greater risk of varicose veins and related conditions (e.g., those with genetic risk factors), an unintended positive health equity benefit that might occur as a result of this project is that it will divert low acuity vein cases from higher need settings, such as hospital operating rooms, freeing those rooms for higher acuity and more emergent procedures.

3. How will the amount of indigent care, both free and below cost, change (if at all) if the project is implemented? Include the current amount of indigent care, both free and below cost, provided by the Applicant.

The current amount of indigent care provided by the Applicant is outlined below. As the number of total services provided at the center will increase, the overall amount of indigent care may also increase. However, the proportion of uncompensated/charity care compared to compensated care is likely to remain the same as the demographics of the population served is not expected to change significantly. Additionally, the Applicant will maintain its commitment to broad community services and the provision of charity care in compliance with New York State regulations for ambulatory surgery services. This will be achieved through the Applicant's charity care policy and commitment to providing a volume of at least 2% in charity care cases annually, partnerships with local Federally Qualified Health Centers (FQHCs), and contractual agreements with Medicaid managed care plans. The Applicant currently has partnerships with eight NYC-based FQHCs and is in contract with five Medicaid managed care plans.

Charity Care:

- 2023 43 cases, \$86,000
- 2024 20 cases, \$40,000
- 2025 through 6/6 7 cases, \$14,000

Write Offs for Uncompensated Care:

- 2023 16 patients, \$15,764.73
- 2024 –10 patients, \$4,486.51
- 2025 through May 5 patients, \$3,200.81

Bad Debt Write Offs:

- 2023 86 patients, \$5,044.69
- 2024 168 patients, \$24,645.29

- 2025 through May 87 patients, \$9,159.91
- 4. Describe the access by public or private transportation, including Applicant-sponsored transportation services, to the Applicant's service(s) or care if the project is implemented.

The facility is accessible via several public transportation options:

Subway:

- Fulton Street Station (A/C, J/Z, 4/5 lines) is an approximately 1-minute walk
- Cortlandt Street Station (R/W line) is an approximately 4-minute walk
- World Trade Center (E line) is an approximately 7-minute walk

Bus:

- M15 Local & M15 Select Bus Service (SBS)
- M103
- M9
- M55
- 5. Describe the extent to which implementation of the project will reduce architectural barriers for people with mobility impairments.

The facility is currently compliant with all ADA accessibility requirements.

6. Describe how implementation of the project will impact the facility's delivery of maternal health care services and comprehensive reproductive health care services, as that term is used in Public Health Law § 2599-aa, including contraception, sterility procedures, and abortion. How will the project impact the availability and provision of reproductive and maternal health care services in the service area? How will the Applicant mitigate any potential disruptions in service availability?

N/A

Meaningful Engagement

7. List the local health department(s) located within the service area that will be impacted by the project.'

New York City Department of Health and Mental Hygiene (DOHMH)

8. Did the local health department(s) provide information for, or partner with, the Independent Entity for the HEIA of this project?

Yes, the Independent Entity spoke with DOHMH on July 17, 2025 and they provided a statement for inclusion in the assessment (see Meaningful Engagement tables for the full statement). DOHMH did not have any serious concerns with the project and encouraged the facility to leverage existing partnerships and monitor marketing and referrals to ensure equitable access.

DOHMH had questions regarding scheduling availability, staff capacity, consultations, staff training, and charity care. In response to these questions, LEC clarified that first availability for appointments is at 7am, allowing for morning appointments. There are 4 procedure rooms, and frequently only 3 are in use, ensuring adequate capacity for vein procedures to take place in both the morning and afternoon timeframes. For both staff and physical space, the facility reported that it is not at capacity and can comfortably meet the expected demand. For staff training, staff will observe cases at the vascular surgeons existing office within VIP Medical (156 William Street, Suite 302, New York, NY 10038), which is in the same building as LEC. Trainings will be scheduled around current operational needs to ensure sufficient staffing is maintained. When a patient is scheduled – either insured or uninsured – the LEC and VIP Medical billing and financial teams will meet to discuss any upfront fees. For insured patients, this would include copays for the total cost of care. In the event a patient is receiving care pro bono, this will be clearly discussed upfront and agreed upon by both teams. The facility will never surprise bill patients.

9. Meaningful engagement of stakeholders: Complete the "Meaningful Engagement" table in the document titled "HEIA Data Table". Refer to the Instructions for more guidance.

Please refer to attached spreadsheet titled "heia_data_tables_LEC.xlsx"

10. Based on your findings and expertise, which stakeholders are most affected by the project? Has any group(s) representing these stakeholders expressed concern the project or offered relevant input?

The stakeholders most affected by this proposed project are individuals who suffer from varicose veins and related conditions or complications, such as pain, ulcers, chronic

venous disease/insufficiency, and deep vein thrombosis. None of the stakeholders interviewed or surveyed as part of this assessment expressed any concern related to the project. All interviewees were supportive of the project, with most indicating that the new service line would fit in seamlessly within the center's existing care model and philosophy.

All survey respondents were either supportive of the project or felt neutral about it. One respondent questioned how the center intends to adjust the facility or hire staff that are well versed in vein procedures, given their current focus on gastroenterology. No other concerns regarding the project were voiced by survey respondents.

11. How has the Independent Entity's engagement of community members informed the Health Equity Impact Assessment about who will benefit as well as who will be burdened from the project?

As part of our stakeholder engagement, we conducted one-on-one interviews with vascular surgeons, employees, partners, and associations. We also distributed a community survey that was available in both English and Spanish and open for three weeks. Although the survey was prominently displayed in the facility and staff actively encouraged participation, the response rate remained low. Our stakeholder and community engagement complemented our data analysis by providing qualitative insights into the medically underserved populations that may be impacted.

12. Did any relevant stakeholders, especially those considered medically underserved, not participate in the meaningful engagement portion of the Health Equity Impact Assessment? If so, list.

SPG's stakeholder engagement process involved developing a comprehensive outreach strategy to a diverse set of stakeholders from which we sought feedback for the assessment. As part of this effort, we conducted 7 interviews with staff, referral and community partners, and the local health department and received 4 responses to our survey from patients, family members, and employees.

The demographics of the survey respondents are outlined below:

Table 1. Race/Ethnicity

•	White	1
9	Black or African American	2
0	Asian American, Pacific Islander, Native Hawaiian	0
0	Hispanic or Latino	0
0	Native or Indigenous American	0
9	Middle East or North African	0
0	Prefer not to answer	0
•	Other	1

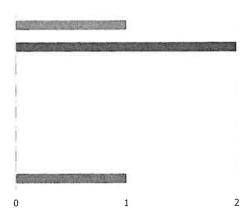

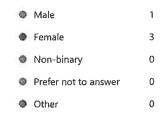

Table 2. Gender

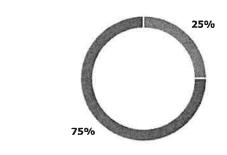

Table 3. Insurance Coverage

0	Medicaid recipient	0
0	Medicare recipient	0
0	Person with other public health coverage (i.e. Veteran's Affairs)	0
0	Person eligible for or currently receiving public health benefits (i.e. SNAP, WIC)	0
٥	Person who has private or employer- sponsored health insurance coverage	3
0	Person who does not have health insurance coverage	0
0	I am not sure	0
9	Prefer not to answer	1
9	Other	0

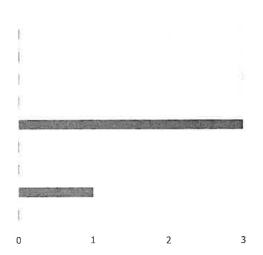

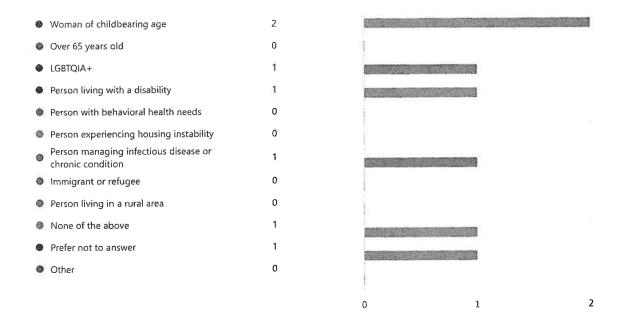

Table 4. Other Demographics

We attempted to reach as many organizations/individuals/groups as possible that represent the medically underserved groups impacted by the project. While we believe that we received adequate feedback from a diverse group of stakeholders, we recognize that certain individuals/populations may have faced barriers to participation. For example, most opportunities for participation were delivered via electronic means (i.e., online survey), potentially limiting participation for those with limited access to the Internet/electronic equipment. However, we believe that the medically underserved groups impacted by the project were adequately represented by the individuals from whom we received feedback during the stakeholder engagement process.

STEP 3 - MITIGATION

- If the project is implemented, how does the Applicant plan to foster effective communication about the resulting impact(s) to service or care availability to the following:
 - a. People of limited English-speaking ability
 - b. People with speech, hearing or visual impairments
 - c. If the Applicant does not have plans to foster effective communication, what does the Independent Entity advise?

The Applicant has an interpreter service that is used to support individuals who speak other languages or who require American Sign Language (ASL) services. Some of the clinical and administrative staff are also bi- or tri-lingual.

2. What specific changes are suggested so the project better meets the needs of each medically underserved group (identified above)?

To ensure awareness of the services and seamless referral pathways for women, the Applicant should explore partnerships with women's health and social service providers, such as OB-GYN practices, WIC sites, birthing centers, and Planned Parenthood sites. The Applicant could also consider hosting virtual "lunch-and-learn" webinars on venous diseases for women's health advocacy groups and organizations.

To reach and serve older adults, the Applicant can collaborate with senior centers, home health agencies, and long-term care providers to publicize the new vein care options and arrange transportation or ambulette services where needed. Communication and appointment reminders should meet the needs and preferences of older adults, including phone calls/mail instead of email/text as necessary.

The Applicant can draw on its proven track record in community outreach — especially its partnerships with FQHCs and the Citywide Colorectal Cancer Control Coalition (C5) — to ensure these services reach underserved populations more broadly. The Applicant can also leverage its existing relationships with primary care providers and OB-GYN practices to support access to colonoscopy screenings.

Finally, the Applicant should proactively reassure current gastroenterology patients that their care experience — and the clinical team providing it — will remain unchanged.

3. How can the Applicant engage and consult impacted stakeholders on forthcoming changes to the project?

The Applicant should maintain open communication with staff, current and prospective patients, and referral sources to confirm the new services integrate smoothly into existing workflows and meet everyone's needs. Once approved, the Applicant intends to alert its physician and FQHC partners about the availability of the new services and to put it on their website so that the community is aware. These steps will keep all stakeholders informed, engaged, and empowered to shape the service as it grows.

4. How does the project address systemic barriers to equitable access to services or care? If it does not, how can the project be modified?

The project may address systemic barriers to care such as:

- **1. High Cost of Care:** By providing services in a community-based setting, patients may experience reduced cost of care as compared to hospital inpatient or outpatient settings that may include facility fees and other costs.
- **2.** Administrative Hurdles: The new access point in lower Manhattan may improve wait times and scheduling bottlenecks while providing additional appointment options for patients.
- **3. Transportation and Mobility Issues:** A community-based clinic accessible by subway/bus can reduce transportation barriers, particularly for older adults and other populations that need to rely on public transportation or caregivers for medical trips.

STEP 4 - MONITORING

1. What are existing mechanisms and measures the Applicant already has in place that can be leveraged to monitor the potential impacts of the project?

The Applicant currently analyzes patient outcomes and experience using clinical data and Press Ganey surveys. The Applicant also conducts risk assessments for infections and falls. The new patient population accessing vein procedures will be added to these standardized assessments.

2. What new mechanisms or measures can be created or put in place by the Applicant to ensure that the Applicant addresses the findings of the HEIA?

The Applicant should partner with the vascular surgeons to develop appropriate clinical quality and safety metrics specific to the new procedures, such as 30-day vein occlusion rates, reintervention rates, and ulcer-free survival rates. Metrics should be stratified by age, sex, race/ethnicity, insurance type, and interpreter use to monitor health equity impact. Additional measures should be considered related to implementation, staff engagement, and workflows to ensure smooth integration and operation of the new services.

STEP 5 - DISSEMINATION

The Applicant is required to publicly post the CON application and the HEIA on its website within one week of acknowledgement by the Department. The Department will also publicly post the CON application and the HEIA through NYSE-CON within one week of the filing.

OPTIONAL: Is there anything else you would like to add about the health equity impact of this project that is not found in the above answers? (250 words max)

----- SECTION BELOW TO BE COMPLETED BY THE APPLICANT ------

SECTION C. ACKNOWLEDGEMENT AND MITIGATION PLAN

Acknowledgment by the Applicant that the Health Equity Impact Assessment was reviewed by the facility leadership before submission to the Department. This section is to be completed by the Applicant, not the Independent Entity.

I. Acknowledgement

I, (Liberty Endoscopy Center), attest that I have reviewed the Health Equity Impact Assessment for the (LEC VIP Medical) that has been prepared by the Independent Entity, (Sachs Policy Group).

II. Mitigation Plan

If the project is approved, how has or will the Applicant mitigate any potential negative impacts to medically underserved groups identified in the Health Equity Impact Assessment? (1000 words max)

Please note: this narrative must be made available to the public and posted conspicuously on the Applicant's website until a decision on the application has been made.

Liberty Endoscopy Center recognizes its responsibility to ensure that the addition of vein procedures does not create or exacerbate barriers to care for medically underserved groups. The Center has an established Uncompensated Care Policy and partnerships with federally funded clinics, which will continue to mitigate potential negative health and/or financial impacts for patients who are unable to pay for services.

Under its policy, Liberty Endoscopy Center is committed to providing uncompensated care to individuals who have received services and can substantiate their inability to pay. The Center follows a structured and equitable process to support patients facing financial hardship. The Center's existing outreach program works closely with local providers to provide affordable care to underserved residents of the Center's primary service area. Patients are not excluded from the policy based on ability to pay. The Center provides charity care at no cost to patients without insurance who are unable to pay and utilizes a sliding fee scale for those with insurance who experience financial hardship.

The Center also provides uncompensated care as part of its charity care program. The Center has initiated discussions with state funded vascular outreach programs to expand its impact. Through existing and forthcoming agreements with local federally funded clinics the Center ensures access for uninsured and underinsured patients within underserved communities.

Liberty Endoscopy Center anticipates that the implementation of vein procedures will not disproportionately impact medically underserved groups. By integrating the uncompensated care policy and additional targeted outreach programs into the operational planning for the vein service line, Liberty Endoscopy Center will continue to uphold its mission of equitable and inclusive care delivery, addressing social determinants of health and reducing barriers for vulnerable populations.

New York State Department of Health

Health Equity Impact Assessment Conflict-of-Interest

This Conflict-of-Interest form must be completed in full, signed by the Independent Entity, and submitted with the Health Equity Impact Assessment.

Section 1 - Definitions

Independent Entity means individual or organization with demonstrated expertise and experience in the study of health equity, anti-racism, and community and stakeholder engagement, and with preferred expertise and experience in the study of health care access or delivery of health care services, able to produce an objective written assessment using a standard format of whether, and if so how, the facility's proposed project will impact access to and delivery of health care services, particularly for members of medically underserved groups.

Conflict of Interest shall mean having a financial interest in the approval of an application or assisting in drafting any part of the application on behalf of the facility, other than the health equity assessment.

Section 2 - Independent Entity

What does it mean for the Independent Entity to have a conflict of interest? For the purpose of the Health Equity Impact Assessment, if one or a combination of the following apply to the Independent Entity, the Independent Entity **HAS** a conflict of interest and must **NOT** perform the Health Equity Impact Assessment:

- The Independent Entity helped compile or write any part of the Certificate of Need (CON) application being submitted for this specific project, other than the Health Equity Impact Assessment (for example, individual(s) hired to compile the Certificate of Need application for the facility's project cannot be the same individual(s) conducting the Health Equity Impact Assessment);
- The Independent Entity has a financial interest in the outcome of this specific project's Certificate of Need application (i.e. individual is a member of the facility's Board of Directors or advisory board); or
- The Independent Entity has accepted or will accept a financial gift or incentive from the Applicant above fair market value for the cost of performing the Health Equity Impact Assessment.

Section 3 - General Information

A. About the Independent Entity

- 1. Name of Independent Entity: Sachs Policy Group
- 2. Is the Independent Entity a division/unit/branch/associate of an organization (Y/N)?
 - If yes, indicate the name of the organization:

Ankura Consulting Group, LLC

- 3. Is the Independent Entity able to produce an objective written Health Equity Impact Assessment on the facility's proposed project (Y/N)?
- 4. Briefly describe the Independent Entity's previous experience working with the Applicant. Has the Independent Entity performed any work for the Applicant in the last 5 years? **N/A**

Section 4 - Attestation

I, <u>David Gross</u>, having personal knowledge and the authority to execute this Conflict of Interest form on behalf of <u>Sachs Policy Group</u>, do hereby attest that the Health Equity Impact Assessment for project <u>LEC VIP Medical</u> provided for <u>Liberty Endoscopy</u> <u>Center</u> has been conducted in an independent manner and without a conflict of interest as defined in Title 10 NYCRR § 400.26.

I further attest that the information provided by the INDEPENDENT ENTITY in the Health Equity Impact Assessment is true and accurate to the best of my knowledge, and fulfills the intent of the Health Equity Impact Assessment requirement.

	David Gross	
Signature of Independent Entity:

In conjunction with this list, you will need to provide documentation from the regulatory agency in the state(s) where affiliations are noted, reflecting that the facilities/programs/agencies have operated in substantial compliance with applicable codes, rules and regulations for the past ten (10) years (or for the period of the affiliation, whichever is shorter). More information regarding this requirement can be found in Schedule 2D.

MEMBER RESOLUTION

LIBERTY ENDOSCOPY CENTER, LLC

The undersigned being a member of Liberty Endoscopy Center, LLC, an existing free standing ambulatory surgery center, does hereby ratify and confirm, approve and adopt the following as and for the resolutions of Liberty Endoscopy Center, LLC:

WHEREAS, Liberty Endoscopy Center LLC desires to add a service line under Article 28 of the New York Public Health Law; and

WHEREAS, in order to accomplish the foregoing, Liberty Endoscopy Center, LLC must file with the New York State Department of Health a Full Review Certificate of Need Application (CON Application).

NOW, THEREFORE, be it

RESOLVED, that Liberty Endoscopy Center, LLC is hereby authorized, directed and empowered to submit a CON Application to the New York State Department of Health, for the purpose of adding vascular surgery as a specialty to existing single-specialty freestanding ambulatory surgical center, with no construction, under Article 28 of the New York Public Health Law; and it is further

RESOLVED, that Liberty Endoscopy Center, LLC is authorized to perform any and all acts, which may be required in order to accomplish the foregoing.

Working Capital Financing Plan

1. Working Capital Financing Plan and Pro Forma Balance Sheet:

This section should be completed in conjunction with the monthly Cash Flow. The general guidelines for working capital requirements are two months of first year expenses for changes of ownership and two months' of third year expenses for new establishments, construction projects or when the first year budget indicates a net operating loss. Any deviation from these guidelines must be supported by the monthly cash flow analysis. If working capital is required for the project, all sources of working capital must be indicated clearly. Borrowed funds are limited to 50% of total working capital requirements and cannot be a line of credit. Terms of the borrowing cannot be longer than 5 years or less than 1 year. If borrowed funds are a source of working capital, please summarize the terms below, and attach a letter of interest from the intended source of funds, to include an estimate of the principal, term, interest rate and payout period being considered. Also, describe and document the source(s) of working capital equity.

Titles of Attachments Related to Borrowed Funds	Filenames of Attachments
Example: First borrowed fund source	Example: first_bor_fund.pdf
N/A	

In the section below, briefly describe and document the source(s) of working capital equity

Working capital needs for this project will be funded by the Center with cash from ongoing profitable operations. Please see the Cash Flow Analysis under the Schedule 5 Attachment and the Center's financial statements under the Schedule 9 Attachment.

2. Pro Forma Balance Sheet

This section should be completed for all new establishment and change in ownership applications. On a separate attachment identified below, provide a pro forma (opening day) balance sheet. If the operation and real estate are to be owned by separate entities, provide a pro forma balance sheet for each entity. Fully identify all assumptions used in preparation of the pro forma balance sheet. If the pro forma balance sheet(s) is submitted in conjunction with a change in ownership application, on a line-by-line basis, provide a comparison between the submitted pro forma balance sheet(s), the most recently available facility certified financial statements and the transfer agreement. Fully explain and document all assumptions.

Example: Operational_bal_sheet.pdf

Schedule 6 Architectural/Engineering Submission

Contents:

o Schedule 6 - Architectural/Engineering Submission

Architectural Submission Requirements for Contingent Approval and Contingency Satisfaction

Schedule applies to all projects with construction, including Articles 28 & 40, i.e., Hospitals, Diagnostic and Treatment Centers, Residential Health Care Facilities, and Hospices.

Instructions

- · Provide Architectural/Engineering Narrative using the format below.
- Provide Architect/Engineer Certification form:
 - Architect's Letter of Certification for Proposed Construction or Renovation for Projects That Will Be Self-Certified. Self-Certification Is Not an Option for Projects over \$15 Million, or Projects Requiring a Waiver (PDF)
 - Architect's Letter of Certification for Proposed Construction or Renovation Projects to Be Reviewed by DOH or DASNY. (PDF) (Not to Be Submitted with Self-Certification Projects)
 - o Architect's Letter of Certification for Completed Projects (PDF)
 - o Architect's or Engineer's Letter of Certification for Inspecting Existing Buildings (PDF)
- Provide FEMA BFE Certificate. Applies only to Hospitals and Nursing Homes.
 - FEMA Elevation Certificate and Instructions.pdf
- Provide Functional Space Program: A list that enumerates project spaces by floor indicating size by gross floor area and clear floor area for the patient and resident spaces.
- For projects with imaging services, provide Physicist's Letter of Certification and Physicist's Report including drawings, details and supporting information at the design development phase.
 - Physicist's Letter of Certification (PDF)
- Provide Architecture/Engineering Drawings in PDF format created from the original electronic files;
 scans from printed drawings will not be accepted. Drawing files less than 100 MB, and of the same trade, may be uploaded as one file.
 - NYSDOH and DASNY Electronic Drawing Submission Guidance for CON Reviews
 - DSG-1.0 Schematic Design & Design Development Submission Requirements
- Refer to the Required Attachment Table below for the Schematic Design Submission requirements for Contingent Approval and the Design Development Submission requirements for Contingency Satisfaction.
 - o Attachments must be labeled accordingly when uploading in NYSE-CON.
 - Do not combine the Narrative, Architectural/Engineering Certification form and FEMA BFE Certificate into one document.
 - If submitted documents require revisions, provide an updated Schedule 6 with the revised information and date within the narrative.

Architecture/Engineering Narrative

Narrative shall include but not limited to the following information. Please address all items in the narrative including items located in the response column. Incomplete responses will not be accepted.

Project Description	
Schedule 6 submission date:June 12, 2025 Click to enter a date.	Revised Schedule 6 submission date: Click to enter a date.
Does this project amend or supersede prior CON If so, what is the original CON number? Click he	
Intent/Purpose: Add vascular procedures as a specialty to existing single specialty free standing ambulatory surgery cent with no construction.	
Site Location: 156 William Street NYC NY	

Brief description of current facility, including facility type:	
Existing facility is an operating single specialty Ambulatory Surgical Center for gar	stroenterological
procedures with four procedure rooms. Brief description of proposed facility:	
Facility will not be modified, just additional procedures performed.	
Location of proposed project space(s) within the building. Note occupancy type for	r each occupied space.
Facility is located on the 4th floor of a commercial and medical building.	
Indicate if mixed occupancies, multiple occupancies and or separated occupancies	s. Describe the required
smoke and fire separations between occupancies:	
Only two tenants occupy the floor and 1 hour rated construction separate the tena	
If this is an existing facility, is it currently a licensed Article 28 facility?	Yes No
Is the project space being converted from a non-Article 28 space to an Article 28 space?	NO
Relationship of spaces conforming with Article 28 space and non-Article 28 space Public access spaces and corridors are provided to access the article 28 Facility.	
List exceptions to the NYSDOH referenced standards. If requesting an exception,	note each on the
Architecture/Engineering Certification form under item #3.	
N/A	
Does the project involve heating, ventilating, air conditioning, plumbing, electrical,	Choose an item.
water supply, and fire protection systems that involve modification or alteration of	
clinical space, services or equipment such as operating rooms, treatment,	
procedure rooms, and intensive care, cardiac care, other special care units (such	L
as airborne infection isolation rooms and protective environment rooms), laboratories and special procedure rooms, patient or resident rooms and or other	
spaces used by residents of residential health care facilities on a daily basis? If so	
please describe below.	
N/A	
Provide brief description of the existing building systems within the proposed space	ce and overall building
systems, including HVAC systems, electrical, plumbing, etc.	1.1: 6
Facility is equipped existing HVAC system in compliance with FGI and ASHRAE I	egulations for an ASC.
Plumbing and Electrical systems are existing and designed per article 28 requirm sprinklered and protected with a 24 hour central station monitored fire alarm systems.	
Describe scope of work involved in building system upgrades and or replacement	
electrical, Sprinkler, etc.	o,,
N/A	
Describe existing and or new work for fire detection, alarm, and communication s	ystems:
N/A	acta from usus fama gov
If a hospital or nursing home located in a flood zone, provide a FEMA BFE Certificand describe the work to mitigate damage and maintain operations during a flood	event. N/A
Does the project contain imaging equipment used for diagnostic or treatment purp	oses? If yes, describe the
equipment to be provided and or replaced. Ensure physicist's letter of certification N/A	and report are submitted.
Does the project comply with ADA? If no, list all areas of noncompliance.	
Yes

Project Work Area	Response
Type of Work	Addition
Square footages of existing areas, existing floor and or existing building.	8687sf
Square footages of the proposed work area or areas.	0
Provide the aggregate sum of the work areas. Does the work area exceed more than 50% of the smoke compartment, floor or	Not Applicable
building?	- Not Applicable
Sprinkler protection per NFPA 101 Life Safety Code	Sprinklered throughout
Sprinkler protection bei NEFA TOT Life Safety Code	

Schedule 6

Construction Type per NFPA 101 Life Safety Code and NFPA 220	Type 1 (332)
Building Height	132'
Building Number of Stories	12
Which edition of FGI is being used for this project?	2018 Edition of FGI
Is the proposed work area located in a basement or underground building?	Not Applicable
Is the proposed work area within a windowless space or building?	Not Applicable
Is the building a high-rise?	Yes
If a high-rise, does the building have a generator?	No
What is the Occupancy Classification per NFPA 101 Life Safety Code?	Chapter 20 New Ambulatory Health Care Occupancy
Are there other occupancy classifications that are adjacent to or within this facility? If yes, what are the occupancies and identify these on the plans. Office	Yes
Will the project construction be phased? If yes, how many phases and what is the duration for each phase? Click here to enter text.	Not Applicable
Does the project contain shell space? If yes, describe proposed shell space and identify Article 28 and non-Article 28 shell space on the plans. Click here to enter text.	Not Applicable
Will spaces be temporarily relocated during the construction of this project? If yes, where will the temporary space be? Click here to enter text.	Not Applicable
Does the temporary space meet the current DOH referenced standards? If no, describe in detail how the space does not comply. Click here to enter text.	Yes
Is there a companion CON associated with the project or temporary space? If so, provide the associated CON number. Click here to enter text.	Not Applicable
Will spaces be permanently relocated to allow the construction of this project? If yes, where will this space be? Click here to enter text.	Not Applicable
Changes in bed capacity? If yes, enumerate the existing and proposed bed capacities. Click here to enter text.	Not Applicable
Changes in the number of occupants? If yes, what is the new number of occupants? Click here to enter text.	Not Applicable
Does the facility have an Essential Electrical System (EES)? If yes, which EES Type? Type 2	Yes
If an existing EES Type 1, does it meet NFPA 99 -2012 standards?	Not Applicable
Does the existing EES system have the capacity for the additional electrical loads? Click here to enter text.	Yes
Does the project involve Operating Room alterations, renovations, or rehabilitation? If yes, provide brief description. Click here to enter text.	Not Applicable
Does the project involve Bulk Oxygen Systems? If yes, provide brief description. Click here to enter text.	Not Applicable
If existing, does the Bulk Oxygen System have the capacity for additional loads without bringing in additional supplemental systems?	Not Applicable
Does the project involve a pool?	Not Applicable

CONSTRUCTION PROJECT CERTIFICATION LETTER FOR AER REVIEWS ARCHITECTS & ENGINEERS

(For projects not meeting the prerequisites for Self-Certification submission.)

Date: March 31, 2025

CON Number:

Facility Name: Liberty Endoscopy Center, LLC

Facility ID Number: 10009

Facility Address: 156 William Street, New York, NY

NYS Department of Health/Office of Health Systems Management Center for Health Care Facility Planning, Licensure, and Finance Bureau of Architectural and Engineering Review ESP, Corning Tower, 18th Floor Albany, New York 12237

To The New York State Department of Health:

I hereby certify that:

- I have been retained by the aforementioned facility, to provide professional architectural/engineering services related to the
 design and preparation of construction documents, including drawings and specifications for the aforementioned project.
 During the course of construction, periodic site observation visits will be performed, and the necessary standard of care,
 noting progress, quality and ensuring conformance of the work with documents provided for all regulatory approvals
 associated with the aforementioned project.
- 2. I have ascertained that, to the best of my knowledge, information and belief, the completed structure will be designed and constructed, in accordance with the functional program for the referenced construction project and in accordance with any project definitions, waivers or revisions approved or required by the New York State Department of Health.
- 3. The above-referenced construction project will be designed and constructed in compliance with all applicable local codes, statutes, and regulations, and the applicable provisions of the State Hospital Code -- 10 NYCRR Part 711 (General Standards for Construction) and Parts (check all that apply):

 b713 (Standards of Construction for Nursing Home Facilities) c714 (Standards of Construction for Adult Day Health Care Program Facilities) dX715 (Standards of Construction for Freestanding Ambulatory Care Facilities) e716 (Standards of Construction for Rehabilitation Facilities) f717 (Standards of Construction for New Hospice Facilities and Units) PLEASE NOTE ANY EXCEPTIONS HERE: 2018 FGI Guidelines 	a.	712 (Standards of Construction for General Hospital Facilities)
 d. X715 (Standards of Construction for Freestanding Ambulatory Care Facilities) e716 (Standards of Construction for Rehabilitation Facilities) f717 (Standards of Construction for New Hospice Facilities and Units) PLEASE NOTE ANY EXCEPTIONS HERE: 	b.	713 (Standards of Construction for Nursing Home Facilities)
e716 (Standards of Construction for Rehabilitation Facilities) f717 (Standards of Construction for New Hospice Facilities and Units) PLEASE NOTE ANY EXCEPTIONS HERE:		
f717 (Standards of Construction for New Hospice Facilities and Units) PLEASE NOTE ANY EXCEPTIONS HERE:	d.	X715 (Standards of Construction for Freestanding Ambulatory Care Facilities)

2018 FGI Guidelines		
		2018 FGI Guidelines

4. I understand that as the design of this project progresses, if a component of this project is inconsistent with the State Hospital Code (10 NYCRR Parts 711, 712, 713, 714, 715, 716, or 717), I shall bring this to the attention of the Bureau of Architecture and Engineering Review (BAER) of the New York State Department of Health prior to or upon submitting final drawings for compliance resolution.

ARCHITECTURAL AND ENGINEERING LETTER OF CERTIFICATION

5. I understand that upon completion of construction, the costs of any subsequent corrections necessary to achieve compliance with applicable requirements of 10 NYCRR Parts 711, 712, 713, 714, 715, 716 and 717, when the prior work was not completed properly as certified herein, may not be considered allowable costs for reimbursement under 10 NYCRR Part 86.

This certification is being submitted to facilitate the CON review and subsequent to formal plan approval by your office. It is understood that an electronic copy of final Construction Documents on CD, meeting the requirements of DSG-05 must be submitted to PMU for all projects, including limited, administrative, full review, self-certification and reviews performed and completed by DASNY.

Schedule LRA 4/Schedule 7 CON Forms Regarding Environmental issues

Contents:

Schedule LRA 4/Schedule 7 - Environmental Assessment

Part I.	The following questions help determine whether the project is "significant" from an environmental standpoint.	Yes	No
1,1	If this application involves establishment, will it involve more than a change of name or ownership only, or a transfer of stock or partnership or membership interests only, or the conversion of existing beds to the same or lesser number of a different level of care beds?		
1.2	Does this plan involve construction and change land use or density?		
1.3	Does this plan involve construction and have a permanent effect on the environment if temporary land use is involved?		\boxtimes
1.4	Does this plan involve construction and require work related to the disposition of asbestos?		
Part II.	If any question in Part I is answered "yes" the project may be significant, and Part II must be completed. If all questions in Part II are answered "no" it is likely that the project is not significant	Yes	No
2.1	Does the project involve physical alteration of ten acres or more?		
2.2	If an expansion of an existing facility, is the area physically altered by the facility expanding by more than 50% and is the total existing and proposed altered area ten acres or more?		\boxtimes
2.3	Will the project involve use of ground or surface water or discharge of wastewater to ground or surface water in excess of 2,000,000 gallons per day?		
2.4	If an expansion of an existing facility, will use of ground or surface water or discharge of wastewater by the facility increase by more than 50% and exceed 2,000,000 gallons per day?		
2.5	Will the project involve parking for 1,000 vehicles or more?		
2.6	If an expansion of an existing facility, will the project involve a 50% or greater increase in parking spaces and will total parking exceed 1000 vehicles?		\boxtimes
2.7	In a city, town, or village of 150,000 population or fewer, will the project entail more than 100,000 square feet of gross floor area?		
2.8	If an expansion of an existing facility in a city, town, or village of 150,000 population or fewer, will the project expand existing floor space by more than 50% so that gross floor area exceeds 100,000 square feet?		
2.9	In a city, town or village of more than 150,000 population, will the project entail more than 240,000 square feet of gross floor area?		
2.10	If an expansion of an existing facility in a city, town, or village of more than 150,000 population, will the project expand existing floor space by more than 50% so that gross floor area exceeds 240,000 square feet?		
2.11	In a locality without any zoning regulation about height, will the project contain any structure exceeding 100 feet above the original ground area?		
2.12	Is the project wholly or partially within an agricultural district certified pursuant to Agriculture and Markets Law Article 25, Section 303?		×
2.13	Will the project significantly affect drainage flow on adjacent sites?		

N/A

2.14	Will the project affect any threatened or endangered plants or animal species?			
2.15	Will the project result in a major adverse effect on air quality?			\boxtimes
2.16	Will the project have a major effect on visual character of the community or scenic views or vistas known to be important to the community?			
2.17	Will the project result in major traffic pransportation systems?	problems or have a major effect on existing		\boxtimes
2.18	Will the project regularly cause object electrical disturbance as a result of the	tionable odors, noise, glare, vibration, or e project's operation?		\boxtimes
2.19	Will the project have any adverse imp	pact on health or safety?		\boxtimes
2.20	Will the project affect the existing community by directly causing a growth in permanent population of more than five percent over a one-year period or have a major negative effect on the character of the community or neighborhood?			\boxtimes
2.21	Is the project wholly or partially within, or is it contiguous to any facility or site listed on the National Register of Historic Places, or any historic building, structure, or site, or prehistoric site, that has been proposed by the Committee on the Registers for consideration by the New York State Board on Historic Preservation for recommendation to the State Historic Officer for nomination for inclusion in said National Register?			\boxtimes
2.22	Will the project cause a beneficial or adverse effect on property listed on the National or State Register of Historic Places or on property which is determined to be eligible for listing on the State Register of Historic Places by the Commissioner of Parks, Recreation, and Historic Preservation?			\boxtimes
2.23	Is this project within the Coastal Zone as defined in Executive Law, Article 42? If Yes, please complete Part IV.			
Part III.			Yes	No
	Are there any other state or local age fill in Contact Information to Question	ncies involved in approval of the project? If so, 3.1 below.

	Phone Number:				
	Is there a public controversy concerning environmental aspects of this project? If		Yes	No	
3.3	yes, briefly describe the controversy in the space below.				
Part IV.	Storm and Flood Mitigation				197
1010101	Definitions of FEMA Flood Zone Designations				
	Flood zones are geographic areas that the FEMA has defined according to varying levels of flood risk. These zones are depicted on a community's Flood Insurance Rate Map (FIRM) or Flood Hazard Boundary Map. Each zone reflects the severity or type of flooding in the area.				
	Please use the FEMA Flood Designations scale below as a guide to answering all Part IV questions regardless of project location, flood and or evacuation zone.			Yes	No
	Is the proposed site located in a flood plain? If Yes, indicate classification below and provide the Elevation Certificate (FEMA Flood Insurance).		\boxtimes		
	Moderate to Low Risk Area		Yes	No	
	Zone Description		X		
4.1	In communities that participate in the NFIP, flood insurance is available to all property owners and renters in these zones:				
	B and X	100-year and 500 of lesser hazards or shallow floodi	e flood hazard, usually the area between the limits of the 0-year floods. Are also used to designate base floodplains , such as areas protected by levees from 100-year flood, ng areas with average depths of less than one foot or ess than 1 square mile.		

C and X	Area of minimal flood hazard, usually depicted on FIRMs as above the 500-year flood level.	\boxtimes	
High Risk Areas		Yes	No
Zone	Description		\boxtimes
In communities that parequirements apply to	articipate in the NFIP, mandatory flood insurance purchase all these zones:		
А	Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones.		
AE	The base floodplain where base flood elevations are provided. AE Zones are now used on new format FIRMs instead of A1-A30.		
A1-30	These are known as numbered A Zones (e.g., A7 or A14). This is the base floodplain where the FIRM shows a BFE (old format).		
АН	Areas with a 1% annual chance of shallow flooding, usually in the form of a pond, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.		
АО	River or stream flood hazard areas, and areas with a 1% or greater chance of shallow flooding each year, usually in the form of sheet flow, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Average flood depths derived from detailed analyses are shown within these zones.		
AR	Areas with a temporarily increased flood risk due to the building or restoration of a flood control system (such as a levee or a dam). Mandatory flood insurance purchase requirements will apply, but rates will not exceed the rates for unnumbered A zones if the structure is built or restored in compliance with Zone AR floodplain management regulations.		
A99	Areas with a 1% annual chance of flooding that will be protected by a Federal flood control system where construction has reached specified legal requirements. No depths or base flood elevations are shown within these zones.		
High Risk Coastal Ar		Yes	No
Zone	Description		
In communities that parequirements apply to	articipate in the NFIP, mandatory flood insurance purchase		
Zone V	Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. No base flood elevations are shown within these zones.		×
VE, V1 - 30	Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived		
	from detailed analyses are shown at selected intervals within these zones.		
Undetermined Risk A	from detailed analyses are shown at selected intervals within these zones.	Yes	No

		Annualist annual to a depart of the second because of the second becond because of the second because of the second because of the s		
	D	Areas with possible but undetermined flood hazards. No flood hazard analysis has been conducted. Flood insurance rates are commensurate with the uncertainty of the flood risk.		
	Are you in a designate	ed evacuation zone?		\boxtimes
4.2	If Yes, the Elevation Certificate (FEMA Flood Insurance) shall be submitted with the application.			
If yes which zone is the site located in?				
	Does this project reflect the post Hurricane Lee, and or Irene, and Superstorm Sandy mitigation standards?			\boxtimes
4.3	If Yes, which	100 Year		
	floodplain?	500 Year		

The Elevation Certificate provides a way for a community to document compliance with the community's floodplain management ordinance.

FEMA Elevation Certificate and Instructions

New York State Department of Health Certificate of Need Application Schedule 8A Summarized Project Cost and Construction Dates

This schedule is required for all Full or Administrative review applications except Establishment-Only applications.

Schedule 9 Proposed Plan for Project Financing:

I. Summary of Proposed Financial plan

Check all that apply and fill in corresponding amounts.

	Туре	Amount
	A. Lease	\$
	B. Cash	\$37,193
	C. Mortgage, Notes, or Bonds	\$
	D. Land	\$
	E. Other	\$
\boxtimes	F. Total Project Financing (Sum A to E) (equals line 10, Column C of Sch. 8b)	\$37,193

If refinancing is used, please complete area below. N/A

Refinancing	\$
Total Mortgage/Notes/Bonds (Sum E + Refinancing)	\$

II. Details

A. Leases

	N/A	Title of Attachment
List each lease with corresponding cost as if purchased each leased item. Breakdown each lease by total project cost and subproject costs, if applicable.	\boxtimes	
2. Attach a copy of the proposed lease(s).		Please refer to the Schedule 9 Attachment. No change to the existing lease.
3. Submit an affidavit indicating any business or family relationships between principals of the landlord and tenant.	\boxtimes	
4. If applicable, provide a copy of the lease assignment agreement and the Landlord's consent to the proposed lease assignment.	\boxtimes	
5. If applicable, identify separately the total square footage to be occupied by the Article 28 facility and the total square footage of the building.		
6. Attach two letters from independent realtors verifying square footage rate.	\boxtimes	
7. For all capital leases as defined by FASB Statement No. 13, "Accounting for Leases", provide the net present value of the monthly, quarterly or annual lease payments.	\boxtimes	

B. Cash

Туре	Amount
Accumulated Funds	\$37,193
Sale of Existing Assets	\$
Gifts (fundraising program)	\$
Government Grants	\$
Other	\$
TOTAL CASH	\$37,193

	N/A	Title of Attachment
1. Provide a breakdown of the sources of cash. See sample table above.		See Chart Above
2. Attach a copy of the latest certified financial statement and current internal financial reports to cover the balance of time to date. If applicable, address the reason(s) for any operational losses, negative working capital and/or negative equity or net asset position and explain in detail the steps implemented to improve operations.		
In establishment applications for Residential Health Care Facilities, attach a copy of the latest certified financial statement and current internal financial reports to cover the balance of time to date for the subject facility and all affiliated Residential Health Care Facilities. If applicable, address the reason(s) for any operational losses, negative working capital and/or negative equity or net asset position and explain in detail the steps implemented (or to be implemented in the case of the subject facility) to improve operations.		Schedule 9 Attachment
3. If amounts are listed in "Accumulated Funds" provide cross- reference to certified financial statement or Schedule 2b, if applicable.		Schedule 9 Attachment
4. Attach a full and complete description of the assets to be sold, if applicable.	\boxtimes	
 5. If amounts are listed in "Gifts (fundraising program)": Provide a breakdown of total amount expected, amount already raised, and any terms and conditions affixed to pledges. If a professional fundraiser has been engaged, submit fundraiser's contract and fundraising plan. Provide a history of recent fund drives, including amount pledged and amount collected 		

	N/A	Title of Attachment
 6. If amounts are listed in "Government Grants": List the grant programs which are to provide the funds with corresponding amounts. Include the date the application was submitted. Provide documentation of eligibility for the funds. Attach the name and telephone number of the contact person at the awarding Agency(ies). 		
7. If amounts are listed in "Other" attach a description of the source of financial support and documentation of its availability.	\boxtimes	
8. Current Department policy expects a minimum equity contribution of 10% of total project cost (Schedule 8b line 10) for all Article 28 facilities with the exception of Residential Health Care Facilities that require 25% of total project cost (Schedule 8b, line 10). Public facilities require 0% equity.		Equity Requirement Met
9. Provide an equity analysis for member equity to be provided. Indicate if a member is providing a disproportionate share of equity. If disproportioned equity shares are provided by any member, check this box	\boxtimes	

C. Mortgage, Notes, or Bonds N/A

	Total Project	Units
Interest		%
Term		Years
Payout Period		Years
Principal		\$

	N/A	Title of Attachment
Attach a copy of a letter of interest from the intended source of permanent financing that indicates principal, interest, term, and payout period.		
If New York State Dormitory Authority (DASNY) financing, then attach a copy of a letter from a mortgage banker.		
Provide details of any DASNY bridge financing to HUD loan.		
4. If the financing of this project becomes part of a larger overall financing, then a new business plan inclusive of a feasibility package for the overall financing will be required for DOH review prior to proceeding with the combined financing.		

D. Land N/A

Provide details for the land including but not limited to; appraised value, historical cost, and purchase price. See sample table below.

	Total Project		
Appraised Value	\$		
Historical Cost	\$		
Purchase Price	\$		
Other			

	N/A	Title of Attachment
1. If amounts are listed in "Other", attach documentation and a description as applicable.		
2. Attach a copy of the Appraisal. Supply the appraised date and the name of the appraiser.		
3. Submit a copy of the proposed purchase/option agreement.		
Provide an affidavit indicating any and all relationships between seller and the proposed operator/owner.		

E. Other N/A

Provide listing and breakdown of other financing mechanisms.

Total Project			
Notes			
Stock			
Other			

	N/A	Title of Attachment
Attach documentation and a description of the method of		
financing		

F. Refinancing N/A

	N/A	Title of Attachment
Provide a breakdown of the terms of the refinancing, including principal, interest rate, and term remaining.		
2. Attach a description of the mortgage to be refinanced. Provide full details of the existing debt and refinancing plan inclusive of original and current amount, term, assumption date, and refinancing fees. The term of the debt to be refunded may not exceed the remaining average useful life of originally financed assets. If existing mortgage debt will not be refinanced, provide documentation of consent from existing lien holders of the proposed financing plan.		

New York State Department of Health Certificate of Need Application Schedule 10 - Space & Construction Cost Distribution

For all Full or Administrative review applications, except Establishment-Only applications. New Construction and Renovation must be entered on separate sheets (see instructions in line 43). Codes for completing this table are found in the Functional Codes Lookups sheet (see tab below).

Schedule 13A

Schedule 13 A. Assurances from Article 28 Applicants

Article 28 applicants seeking combined establishment and construction or construction-only approval must complete this schedule.

The undersigned, as a duly authorized representative of the applicant, hereby gives the following assurances:

- a) The applicant has or will have a fee simple or such other estate or interest in the site, including necessary easements and rights-of-way sufficient to assure use and possession for the purpose of the construction and operation of the facility.
- b) The applicant will obtain the approval of the Commissioner of Health of all required submissions, which shall conform to the standards of construction and equipment in Subchapter C of Title 10 (Health) of the Official Compilation of Codes, Rules and Regulations of the State of New York.
- c) The applicant will submit to the Commissioner of Health final working drawings and specifications, which shall conform to the standards of construction and equipment of Subchapter C of Title 10, prior to contracting for construction, unless otherwise provided for in Title 10.
- d) The applicant will cause the project to be completed in accordance with the application and approved plans and specifications.
- e) The applicant will provide and maintain competent and adequate architectural and/or engineering inspection at the construction site to ensure that the completed work conforms to the approved plans and specifications.
- f) If the project is an addition to a facility already in existence, upon completion of construction all patients shall be removed from areas of the facility that are not in compliance with pertinent provisions of Title 10, unless a waiver is granted by the Commissioner of Health, under Title 10.
- g) The facility will be operated and maintained in accordance with the standards prescribed by law.
- h) The applicant will comply with the provisions of the Public Health Law and the applicable provisions of Title 10 with respect to the operation of all established, existing medical facilities in which the applicant has a controlling interest.
- i) The applicant understands and recognizes that any approval of this application is not to be construed as an approval of, nor does it provide assurance of, reimbursement for any costs identified in the application. Reimbursement for all cost shall be in accordance with and subject to the provisions of Part 86 of Title 10.
